

Utilizing the Find Credits Tool

RIBITS allows users to search approved banks, ILF sites, and ILF programs with available credits whose service areas overlap a specified point or a line. Click on the “**Find Credits**” button to access this tool. The results are based on service areas entered in RIBITS and will not list sources of available credits from Bank and ILF project sites without service areas.

Users may narrow their search by specifying credit classifications and the type of service area desired. The results are displayed under each service area rank. Information on ILF Advance Credits (credits not associated with ILF project sites) will also be displayed under the ILF heading.

The credit totals shown on the ledger do NOT reflect any credit reservations or pending transactions. It is the responsibility of potential purchasers to contact the Sponsor and obtain written confirmation of credit availability.

Above the search criteria section, there is a brief summary that explains the results. Click the black arrow to expand the summary.

About the Results ▾

For single point impacts, the default Latitude/Longitude is the center of the District/State/Field Office/NOAA Fisheries Region. Users may move this point by Ctrl-Click or Shift-Click on the map. Banks, ILF Sites and Programs whose service areas overlap this point and meet the other selection criteria will be listed in the results below.

For linear impacts, check the Linear Impact checkbox and draw a single line along the impact area. Banks, ILF Sites and Programs whose service areas intersect the line and meet the other selection criteria will be listed in the results below.

The results are based on service areas entered in RIBITS and may not represent all available sources of credits from Banks, ILF Sites, and ILF Programs in the area.

Habitat and Species drop downs filter the results based on the credit classifications selected.

The credit totals shown do NOT reflect any credit reservations or pending transactions. It is the responsibility of potential purchasers to contact the Sponsor and obtain written confirmation of credit availability.

This report includes only approved banks that have available credits unless the 'Allow Zero' checkbox is checked.

Report Content:

The report heading describes the location and search criteria and includes the permit number for the impact location (if entered). Search criteria include the latitude/longitude location, service area rank, whether or not it included single-client banks, and whether or not the search allowed zero credits. The heading also includes the State, County, 8-digit HUC, USFWS Field Office, and USACE District of the location.

For each bank found, the report lists the following information:

- Bank name
- Bank Type
- Total Acres
- Distance to impact location
- State
- Comments from the Bank Information page
- Bank Sponsor and contact information
- Bank POC and contact information
- Available Credits for each credit classification

There is also a blank space that may be utilized for the applicant or regulator to add notes.

Searching for Credits:

Project No:

The project number is an optional field that is printed at the top of the report. District regulators utilize this report to assist applicants in finding credits for their projects.

Entering the Latitude and Longitude of a Point

The user may narrow the search area by selecting a District/State/Field Office from main Filter View Section. The center point of the selected District/State/Field Office is the default latitude and longitude for the search fields. The user may adjust the latitude and longitude by Ctrl+Click or Shift+Click on the map to move the point to a different location. Use the additional map layers as a guide to assist in moving the point to the desired location. The latitude and longitude fields will automatically update as the point is moved. Once you have the desired latitude and longitude, click the ‘Search?’ button or enter more search criteria.

Including or Excluding Single Client Banks:

A user may choose to include or exclude Single Client Banks. Single Client Banks provide compensation for a single user like a county, military base, or state Department of Transportation (DOT). The Find Credits Tools automatically defaults to exclude Single Client Banks. To include Single Client Banks in the search, check the ‘Yes’ checkbox next the Single Client label.

Searching for Specific Credit Classifications

Narrow the search further by selecting a specific habitat or multiple habitats. Wetland or Stream habitats and Species habitat credit classifications available within the filtered jurisdiction from the selection list. To select more than one habitat, Click on one habitat, Ctrl + Click on a second habitat and Ctrl + click on another. The results will return approved banks with available credits for the selected habitat or habitats, whose services areas overlap the latitude and longitude.

Primary, Secondary & Tertiary Service Areas

A user may only be interested banks with available credits located in the primary service area. The user may then uncheck the checkboxes for secondary and tertiary. This will exclude the banks with available credits located in the secondary and tertiary service areas.

Allow Zero

A user may choose to include banks that have zero available credits.

Entering Coordinates for a Linear Impact

For linear impacts, check the Linear Impact Checkbox and draw a single line along the impact area. Ctrl+Click or Shift+Click multiple locations on the map to create a line segment to indicate the location of linear impact. Select your habitats or species, service area rank and click the 'Search?' button.

About the Results

After clicking the ‘Search?’ button, the page will darken and a ‘Gathering Report’ message will appear while the results are loading.

The results can be printed as a PDF file or print from the browser by clicking the [Print PDF] or [Browser Print] at the top of the results section.

[\[Print PDF\]](#) [\[Browser Print\]](#)

After the report is generated, users will see the search details listed. There are quick links to help users jump to a specific section in the results.

RIBITS

Regulatory In-lieu Fee and Bank Information Tracking System

Bank Name: 1 - Lake Louisa/Green Swamp MB

Bank Type: Private Commercial

Total Acres: 1007

Distance to impact: 59 Miles

USACE Permit No: SAJ-1995-02208

Bank States: Florida

Comments: The main goal of the project is to restore the property to native upland and wetland communities to protect the surface water and groundwater resources. Also it will provide a corridor for wildlife movement between Lake Louisa State Park and the Green Swamp interior, protect the property in the 'Core Area' of the Green Swamp of critical state concern, and provide a habitat for threatened and endangered species. Functional assessment method used is WRAP.
